

# National Safety and Quality Health Service Standards 2.1 Short Notice Assessment *Final Report*

Hunter Valley Private Hospital

SHORTLAND, NSW

Organisation Code: 120308

Health Service Facility ID: 100795

ABN: 24 002 830 300

Assessment Date: 04 – 06 February 2025

Accreditation Cycle: 1

**Disclaimer:** The information contained in this report is based on the evidence provided by the participating organisation at the time of the accreditation survey and information that the organisation supplied through the reporting and editing process. Accreditation issued by ACHS/ACHSI does not guarantee the ongoing safety, quality or acceptability of an organisation or its services or programs, or that legislative and funding requirements are being met, or will be met.

## Introduction

### **The Australian Council on Healthcare Standards**

The Australian Council on Healthcare Standards (ACHS) is Australia's leading healthcare assessment and accreditation provider. ACHS is an independent, not-for-profit organisation dedicated to improving quality and inspiring excellence in health care. We accredit organisations according to either government standards, or our own established standards.

ACHS is approved to accredit the following standards

- National Safety and Quality Health Service (NSQHS) Standards including the Multi-Purpose Services Aged Care Module (MPS Module)
- National Safety and Quality Digital Mental Health (NSQDMH) Standards
- National Safety and Quality Primary and Community Healthcare (NSQPCH) Standards
- National Clinical Trials Governance Framework
- Royal Australian College of General Practitioners (RACGP) Standards for general practices (5th edition) and the RACGP Standards for point-of-care testing (5th edition)
- National Standards for Mental Health Services (NSMHS)
- Rainbow Tick Standards
- EQUiP Standards

Currently there are more than 1,600 healthcare organisations, including their associates, that undertake ACHS assessment and quality improvement programs. ACHS are proud to accredit the majority of all public and private hospitals in Australia.

With representation from governments, consumers and peak health bodies from throughout Australia, ACHS works with healthcare professionals, consumers, government and industry stakeholders to implement healthcare accreditation programs.

ACHS offers a variety of services including accreditation, education and training, data and benchmarking and consulting. We take a partnership approach to continuous improvement, tailored to the needs of individual services and health systems, using our expertise in accreditation, standards development and education.

### **Australian Commission on Safety and Quality in Health Care**

The Australian Commission on Safety and Quality in Health Care (Commission) leads and coordinates national improvements in healthcare safety and quality. It works in partnership with patients, carers, clinicians, the Australian, state and territory health systems, the private sector, managers and healthcare organisations to achieve a safe, high-quality and sustainable health system.

Key functions of the Commission include developing national safety and quality standards, developing clinical care standards to improve the implementation of evidence-based health care, coordinating work in specific areas to improve outcomes for patients, and providing information, publications and resources about safety and quality.

The Commission works in four priority areas:

1. Safe delivery of health care
2. Partnering with consumers
3. Partnering with healthcare professionals
4. Quality, value, and outcomes

### The Australian Health Service Safety and Quality Accreditation (AHSSQA) Scheme

Under the National Health Reform Act 2011, the Commission is responsible for the formulation of standards relating to health care safety and quality matters. This includes formulating and coordinating the Australian Health Service Safety and Quality Accreditation Scheme (the AHSSQA Scheme), which provides for the national coordination of accreditation processes.

The AHSSQA Scheme sets out the responsibilities of accrediting agencies in relation to implementation of the following safety and quality standards:

- National Safety and Quality Health Service (NSQHS) Standards including the Multi-Purpose Services Aged Care (MPS) Module
- National Safety and Quality Digital Mental Health (NSQDMH) Standards
- National Safety and Quality Primary and Community Healthcare (NSQPCH) Standards, and
- Any other set of standards that may be developed by the Commission from time to time

The National Safety and Quality Health Service (NSQHS) Standards were developed by the Commission in collaboration with the Australian Government, states and territories, the private sector, clinical experts, patients, and carers. The primary aims of the NSQHS Standards are to protect the public from harm and to improve the quality of health service provision. They provide a quality assurance mechanism that tests whether relevant systems are in place to ensure that expected standards of safety and quality are met.

There are eight NSQHS Standards, which cover high-prevalence adverse events, healthcare associated infections, medication safety, comprehensive care, clinical communication, the prevention and management of pressure injuries, the prevention of falls, and responding to clinical deterioration. Importantly, the NSQHS Standards have provided a nationally consistent statement about the standard of care consumers can expect from their health service organisations.

### Rating scale definitions

Whenever the NSQHS Standards (2nd ed.) are assessed, actions are to be rated using the rating scale outline below:

| Rating                          | Description  |
|---------------------------------|--|
| <b>Met</b>                      | All requirements of an action are fully met.   |
| <b>Met with recommendations</b> | <p>The requirements of an action are largely met across the health service organisation, with the exception of a minor part of the action in a specific service or location in the organisation, where additional implementation is required. If there are no not met actions across the health service organisation, actions rated met with recommendations will be assessed during the next assessment cycle. <b>Met with recommendations may not be awarded at two consecutive assessments where the recommendation is made about the same service or location and the same action. In this case an action should be rated not met.</b></p> <p>In circumstances where one or more actions are rated not met, the actions rated met with recommendations at initial assessment will be reassessed at the final assessment. If the action is not fully met at the final assessment, it can remain met with recommendations and reassessed during the next assessment cycle. If the organisation is fully compliant with the requirements of the action, the action can be rated as met.</p> |

| Rating         | Description  |
|----------------|--|
| Not met        | Part or all of the requirements of the action have not been met.   |
| Not applicable | The action is not relevant in the service context being assessed. The Commission's advisory relating to not applicable actions for the health sector need to be taken into consideration when awarding a not applicable rating and assessors must confirm the action is not relevant in the service context during the assessment visit. |

For further information, see [Fact sheet 4: Rating scale for assessment](#)

### Repeat Assessment

If a health service organisation has 16 or more percent of assessed actions **rated not met and /or met with recommendations**, and /or more than 8 actions from the Clinical Governance Standard not met at initial assessment and is subsequently awarded accreditation, the organisation is required to undertake a further assessment within six months of the assessment being finalised. All actions rated not met or met with recommendations from the initial assessment will be reassessed. The aim of the reassessment is to ensure the organisation has fully embedded the necessary improvements in their safety and quality systems to maintain compliance with the NSQHS Standards. This is a one-off assessment with a remediation period of 60 business days. **All actions must be met when the assessment is finalised for the organisation to retain its accreditation.**

For further information, see [Fact Sheet 3: Repeat assessment of health service organisations](#)

### Safety and Quality Advice Centre and Resources

The Advice Centre provides support for health service organisations, assessors, and accrediting agencies on NSQHS Standards implementation, the Primary and Community Healthcare Standards, the Digital Mental Health Standards, the National General Practice Accreditation (NGPA) Scheme, the National Pathology Accreditation Scheme, and the National Diagnostic Imaging Accreditation Scheme.

Telephone: 1800 304 056

Email: [AdviceCentre@safetyandquality.gov.au](mailto:AdviceCentre@safetyandquality.gov.au)

Further information can be found online at the [Commission's Advice Centre](#) via <https://www.safetyandquality.gov.au/>

## Authority to act as an Accrediting Agency

I, Dr Karen Luxford, CEO of the Australian Council on Healthcare Standards (ACHS) declare that ACHS has the approval from the Australian Commission on Safety and Quality in Health Care to conduct assessment to the *National Safety and Quality Health Service Standards 2.1 Short Notice Assessment*. This approval is current until 31<sup>st</sup> December, 2024.

Under this authority, ACHS is authorised to assess health service organisations against the Australian Health Service Safety and Quality Accreditation Scheme.

## Conflicts of Interest

I, Dr Karen Luxford, declare that ACHS has complied with Australian Commission on Safety and Quality in Health Care policy on minimising and managing conflicts of interest.

No conflicts of interest were evident as part of this assessment and no Consultants or third parties participated in this assessment.

Org Name : Hunter Valley Private Hospital  
Org Code : 120308

## Assessment Team

| Assessor Role | Name            | Declaration of independence from health service organisation signed |
|---------------|-----------------|---|
| Lead Assessor | David Gunderson | Yes   |
| Assessor      | Ruth Melville   | Yes   |

## Assessment Determination

ACHS has reviewed and verified the assessment report for Hunter Valley Private Hospital. The accreditation decision was made on 12/03/2025 and Hunter Valley Private Hospital was notified on 12/03/2025.

### How to Use this Assessment Report

The ACHS assessment report provides an overview of quality and performance and should be used to:

1. provide feedback to staff
2. identify where action is required to meet the requirements of the NSQHS Standards
3. compare the organisation's performance over time
4. evaluate existing quality management procedures
5. assist risk management monitoring
6. highlight strengths and opportunities for improvement
7. demonstrate evidence of achievement to stakeholders.

### The Ratings:

Each **Action** within a Standard is rated by the Assessment Team.

A rating report is provided for each health service facility.

The report will identify actions that have **recommendations** and/or comments for each health service facility.

The rating scale is in accordance with the Australian Commission on Safety and Quality in Health Care's Fact Sheet 4: Rating Scale for Assessment:

| Assessor Rating          | Definition   |
|--------------------------|--|
| Met                      | All requirements of an action are fully met.   |
| Met with Recommendations | The requirements of an action are largely met across the health service organisation, with the exception of a minor part of the action in a specific service or location in the organisation, where additional implementation is required. |
| Not Met                  | Part or all of the requirements of the action have not been met.   |
| Not Applicable           | The action is not relevant in the health service context being assessed.   |

### Suggestions for Improvement

The Assessment Team may provide suggestions for improvement for the health service to consider implementing. They are not required to be implemented for an action to achieve a met rating. Suggestions for improvement are documented under the criterion level.

### Recommendations

Not Met/Met with Recommendation rating/s have a recommendation to address in order for the action to be rated fully met. An assessor's comment is also provided for each Not Met/Met with Recommendation rating.

Risk ratings are applied to actions where recommendations are given to show the level of risk associated with the particular action. A risk comment is included if the risk is rated greater than low. Risk ratings are:

1. **E: extreme (significant)** risk; immediate action required.
2. **H: high** risk; senior management attention needed.
3. **M: moderate** risk; management responsibility must be specified.
4. **L: low** risk; manage by routine procedures

## Executive Summary

Hunter Valley Private Hospital underwent a National Safety and Quality Health Service Standards 2.1 Short Notice Assessment (NS2.1 Short Notice Assessment) from 04/02/2025 to 06/02/2025. The assessment required two assessors for a period of three days. Hunter Valley Private Hospital is a Private health service. Hunter Valley Private Hospital was last assessed between 22/2/2022 and 24/2/2022.

PICMoRS was used to conduct this assessment. 75% of available time was spent in operational areas during this assessment.

Hunter Valley Private Hospital (HVPH) is an 83 bed private hospital located in Newcastle NSW. In February 2025 HVPH participated in a short notice NSQHS (second edition) organisation wide assessment. Assessors visited all wards, departments and services. During the assessment, the following methodologies were used to facilitate triangulation of the abundant evidence provided to the team:

- PICMORS.
- Patient Journeys – assessed in their entirety.
- Patient Interviews.
- Proof of Process Journeys – Medications, Blood Products and Reusable Medical Devices.
- High Risk Scenario review of a recent incident related to occupational violence and aggression. The high-risk scenario test was conducted by the General Manager and Director of Nursing.

Evidence was gathered from policy documents, committee and meeting records, audit results, communication with staff, patients and relatives, employment documents and observation by assessors. Greater than 75% of the assessment timetable was allocated to visiting operational and clinical departments. Where applicable, the requirements of the latest versions of the NSQHS (second edition) Advisories were assessed for compliance.

All clinical and non-clinical external contracted services that relate to the standards were verified by the assessment team as being current and reviewed in the last three years.

All actions contained in each of the standards were assessed as MET. One action (5.36) was assessed as not applicable. At the time of the assessment, opportunities for improvement were suggested to the hospital for their consideration and are included within this report as suggestions.

HVPH is led by an enthusiastic and effective executive and senior management team focused on the highest safety and quality outcomes for both patients and staff. Assessors were impressed with the passion and enthusiasm in which staff approached the assessment process and the willingness to share their successes.

HVPH has recognised the diversity of their community and the services they could offer Aboriginal and Torres Strait Islander people if they self-identify at admission. Their risk profile shows similar harm risks as the general patient population, but six specific actions have been implemented to provide culturally appropriate and inclusive care.

The 2024-2025 Healthscope Clinical Governance Plan has been implemented, supported by the HVPH Quality Plan. These documents are used to operationalise and monitor key objectives related to patient care and clinical outcomes. A national Clinical Risk Management Framework is managed

and monitored on a local level. Performance indicators and clinical metrics are collected, analysed, and reported through the Quality Committee and Medical Advisory Committee, and the Healthscope Board.

HVPH has adopted a sustainable approach to person-centred care by collaborating with three consumer consultants. These consultants engage in various activities including bedside audits, health literacy reviews, and committee memberships. Assessors noted multiple instances of patient care involving partnerships with patients according to their preferences.

An education program is in place for all staff, conducted over a five-day orientation program with ongoing education available when communication gaps are identified. Excellent innovative education strategies are key to the continuing high achievements of staff compliance at HVPH with mandatory training and staff performance appraisals.

The HVPH demonstrated excellent leadership for the management of infection prevention and control and antimicrobial stewardship with overall compliance in all clinical areas consistent with the Australian Guidelines for the Prevention and Control of Infection in Healthcare. Documented evidence (Procedures and auditing) along with the patient journey and multidisciplinary staff interactions was observed by the assessors. It was obvious from the first day of assessment, the passion and commitment of the team working together collaboratively to achieve high standards related to infection control practices across all streams from cleaning to clinical practice.

The Antimicrobial Stewardship program is well established and guided by evidence based policies. HVPH contributes to both the Antimicrobial Utilisation Surveillance Program (NUASP) and Surgical National Antimicrobial Prescribing Survey (SNAPS).

Processes are well embedded to support the implementation of a safe medication management system to ensure that clinicians safely prescribe, dispense and administer appropriate medicines, and monitor medicine use. The medication system is regularly reviewed through audit and improvement plans initiated to address any areas identified as requiring further action. All high risk medications are handled appropriately to reduce the risk of improper use. Staff understand the significance of obtaining a Best Possible Medication History, including past adverse reactions, as well as participating in reconciliation and review of the medications taken by a patient. The hospital's outsourced pharmacy staff supports this work. Patients are provided with a range of resources about their medications, with care taken to meet a person's level of health literacy. Staff have easy access to information about medications, along with a range of decision support tools.

Clinicians at HVPH deliver comprehensive care to all patients (inpatient and outpatients) exceptionally well. Comprehensive care is embedded into daily practice at HVPH with systems and processes to support safe effective care across all disciplines. A collaborative approach from all teams was evident to the assessors, as clinicians support each other to achieve patient goals and mitigate specific risks to different patient cohorts as identified. Assessors observed many examples of clinical and non-clinical teams collaborating to meet the patient's needs, across the continuum of care. All staff work together to mitigate falls risk and pressure injuries.

End-of-Life care was provided to a very high standard within the facility in accordance with the National Consensus Statement's Guiding Principles. Staff provide end-of-life care in an environment that is patient/family/carers centred ensuring patient's wishes are met.

Across HVPH, Communicating for Safety is well supported by all (multidisciplinary) staff every day from welcoming the patient at the front door to communication and continuous improvement for safe patient care in all clinical and non-clinical areas across the facility. HVPH has a patient centred

approach with communication to patients, family and carers about many aspects of their care including shared decision making supporting the delivery of continuous and safe care.

Many communication processes involving structured communication were observed by assessors over the three (3) days –clinical handovers, hospital transfers, Perioperative Surgical safety Checklist (SSC), referrals to other multidisciplinary teams; all of these were documented well whilst meeting mandatory patient identification processes every time.

The Healthscope Perioperative SSC was an excellent improvement initiative between HVPH and another Healthscope facility where a Fire Risk Assessment score has been added to this checklist to ensure the risk associated with fire is highlighted every time for every patient to ensure optimal safe care in the perioperative setting.

Clinical risks associated with patient identification, procedure matching or clinical handover are reported in RiskMan and escalated to the Quality Committee and Medical Advisory Committee as required.

The management of blood and blood products at HVPH aligns with the national approach to managing these products. The overall processes and procedures are understood by staff, they are reviewed and managed by the Quality Committee. Assessors were able to observe the rigorous systems and processes that staff have implemented when administering blood and blood products. HVPH works closely with the supplying laboratory for blood and blood products.

The management of recognising and responding to acute deterioration at HVPH is well supported by a range of local and Healthscope policies and procedures. Staff were able to articulate the key communication that is in place for the safe response to acute deterioration across the facility by the multidisciplinary teams including the Code Blue working party.

Other initiatives such as the involvement of consumers to redesign posters for the REACH program to ensure a clear understanding of escalation of care to consumers.

Clinicians are trained and supported to respond appropriately to any signs of deterioration not only with Basic Life Support (BLS) but also Advanced Life Support (ALS) both paediatric and adult in areas that require these specific responses. The ongoing support of ALS training to staff is to be commended.

HVPH has processes in place that staff were able to explain for the rapid referral and transfer for acute deteriorating patients including Anaphylaxis and Sepsis pathways of all patients.

## Summary of Results

Hunter Valley Private Hospital achieved a met rating for all actions and therefore there is no requirement for a follow up assessment.

Further details and specific performance to all of the actions within the standards is provided over the following pages.

## Sites for Assessment

### Hunter Valley Private Hospital

| Site                           | HSFID  | Address                         | Visited | Mode    |
|--------------------------------|--------|---------------------------------|---------|---------|
| Hunter Valley Private Hospital | 100795 | 20 Mawson St SHORTLAND NSW 2307 | Yes     | On Site |

## Contracted Services

The following contracted services are used by Hunter Valley Private Hospital.

| Provider              | Description of Services                | Verified During Assessment |
|-----------------------|--|----------------------------|
| SC Medical            | Anaesthetic machine maintenance        | Yes                        |
| Invitro               | Autoclave maintenance                  | Yes                        |
| SC Medical            | Biomedical                             | Yes                        |
| BGIS                  | Electrical; fire; building maintenance | Yes                        |
| BGIS                  | Nurse Call System                      | Yes                        |
| Laverty Pathology     | Pathology                              | Yes                        |
| Superior Pest Control | Pest Control                           | Yes                        |
| Slade Pharmacy        | Pharmacy                               | Yes                        |
| Hunter Imaging Group  | Radiography                            | Yes                        |
| Phillips              | X-ray Room Equipment                   | Yes                        |
| Caterlec              | Kitchen appliances                     | Yes                        |
| Initial               | Sanitary waste                         | Yes                        |
| SNP/EastLakes         | Security                               | Yes                        |
| Compass Dietitians    | Dietetics                              | Yes                        |
| Shomatsu              | X-ray processor                        | Yes                        |
| H5 Healthcare         | Mattress hire                          | Yes                        |
| APC prosthetics       | Prosthetist                            | Yes                        |
| SC Medical            | Theatre Patient Trolleys               | Yes                        |
| SC Medical            | Theatre table maintenance              | Yes                        |
| Hunter Bone Bank      | Bone bank                              | Yes                        |

Hunter Valley Private Hospital has reviewed these agreements for the listed services in the three years preceding this assessment.

Org Name : Hunter Valley Private Hospital  
Org Code : 120308

## Standard 1 - Clinical Governance

Leaders of a health service organisation have a responsibility to the community for continuous improvement of the safety and quality of their services, and ensuring that they are person centred, safe and effective.

| ACTION 1.01  |                    |
|--|--------------------|
| The governing body: a. Provides leadership to develop a culture of safety and quality improvement, and satisfies itself that this culture exists within the organisation b. Provides leadership to ensure partnering with patients, carers and consumers c. Sets priorities and strategic directions for safe and high-quality clinical care, and ensures that these are communicated effectively to the workforce and the community d. Endorses the organisation's clinical governance framework e. Ensures that roles and responsibilities are clearly defined for the governing body, management, clinicians and the workforce f. Monitors the action taken as a result of analyses of clinical incidents g. Reviews reports and monitors the organisation's progress on safety and quality performance   |                    |
| Comments   |                    |
| A review of available documentation (Consistent with the requirements of the ACSQHC Checklist for Assessors – Reviewing information accessed and actioned by the Governing Body), supported by observation and interviews with a representative from Healthscope's Clinical Governance Unit, demonstrated that a culture of safety and quality improvement had been established. This was reinforced by the HVPH Executive Leadership Team who set the strategic direction and ensures it is clearly communicated. The standardised Healthscope Clinical Governance Framework describes the governance related roles and responsibilities across the services and supports staff to effectively partner with patients and families. A committee structure has been established to monitor the effectiveness of the clinical quality system through audit, data analysis and incident reporting. A risk management approach underpins all aspects of clinical safety and quality. |                    |
| Rating   | Applicable HSF IDs |
| Met  | All                |

Org Name : Hunter Valley Private Hospital  
Org Code : 120308

| ACTION 1.02  |                    |
|--|--------------------|
| The governing body ensures that the organisation's safety and quality priorities address the specific health needs of Aboriginal and Torres Strait Islander people   |                    |
| Comments   |                    |
| Members of the HVPH Management Team were able to describe how the specific health needs of Aboriginal and Torres Strait Islander people are being addressed should they self-identify on admission. The organisation meets the requirements of Advisory AS18/04. |                    |
| Rating   | Applicable HSF IDs |
| Met  | All                |

| ACTION 1.03  |                    |
|--|--------------------|
| The health service organisation establishes and maintains a clinical governance framework, and uses the processes within the framework to drive improvements in safety and quality                     |                    |
| Comments   |                    |
| Senior managers were able to demonstrate to the assessment team how the Clinical Governance Framework is used, and how its effectiveness is monitored and reported, with changes made where indicated. |                    |
| Rating   | Applicable HSF IDs |
| Met  | All                |

| ACTION 1.04  |                    |
|--|--------------------|
| The health service organisation implements and monitors strategies to meet the organisation's safety and quality priorities for Aboriginal and Torres Strait Islander people   |                    |
| Comments   |                    |
| Interviews with staff and consumer consultants, were supported by observation and documentary evidence confirming that HVPH and Healthscope have strategies in place to monitor the effectiveness of quality and safety initiatives aimed at improving health outcomes for Aboriginal and Torres Strait Islander people. |                    |

| ACTION 1.07   |                    |
|---|--------------------|
| The health service organisation uses a risk management approach to: a. Set out, review, and maintain the currency and effectiveness of, policies, procedures and protocols b. Monitor and take action to improve adherence to policies, procedures and protocols c. Review compliance with legislation, regulation and jurisdictional requirements  |                    |
| Comments  |                    |
| Documents reviewed, plus interviews with the senior managers demonstrated how policy documents, procedures and protocols are managed to ensure that they are current, comprehensive, effective, appropriately referenced and comply with legislation and regulations, along with NSW Health and Healthscope requirements. Compliance is monitored through incident reporting, and trends influence the revision of specific policies, procedures and protocols where indicated. A risk management approach was evident in defining the scheduled revision of key documents. |                    |

| ACTION 1.08   |                    |
|---|--------------------|
| The health service organisation uses organisation-wide quality improvement systems that: a. Identify safety and quality measures, and monitor and report performance and outcomes b. Identify areas for improvement in safety and quality c. Implement and monitor safety and quality improvement strategies d. Involve consumers and the workforce in the review of safety and quality performance and systems   |                    |
| Comments  |                    |
| HVPH has a defined quality management system that produces performance and outcome data. Staff, Medical Advisory Committee Chair and consumer consultants confirmed that they receive information on quality and safety performance and that it is actively managed with minutes of meetings. Outcome data and information is used to drive improvements through the clinical governance structure and is made available to staff and other stakeholders who are engaged in performance evaluation. |                    |

| ACTION 1.10  |                    |
|--|--------------------|
| The health service organisation: a. Identifies and documents organisational risks b. Uses clinical and other data collections to support risk assessments c. Acts to reduce risks d. Regularly reviews and acts to improve the effectiveness of the risk management system e. Reports on risks to the workforce and consumers f. Plans for, and manages, internal and external emergencies and disasters   |                    |
| Comments   |                    |
| Management and staff explained how risks are identified and managed and how this is influenced by staff, patients and carers. Information from a broad range of sources informs the HVPH Executive Leadership Team to define and operationalise the risk management system. The system is reviewed and refined as needed to ensure it remains effective in managing both corporate and clinical risks. The risk management system includes business continuity plans to support service delivery in the case of an emergency or disaster. Assessors saw evidence that the system is actively managed, evaluated and improved as needed. This was further verified through a high-risk scenario discussion regarding a recent incident of occupational violence and aggression. |                    |

#### **ACTION 1.11**

The health service organisation has organisation-wide incident management and investigation systems, and: a. Supports the workforce to recognise and report incidents b. Supports patients, carers and families to communicate concerns or incidents c. Involves the workforce and consumers in the review of incidents d. Provides timely feedback on the analysis of incidents to the governing body, the workforce and consumers e. Uses the information from the analysis of incidents to improve safety and quality f. Incorporates risks identified in the analysis of incidents into the risk management system g. Regularly reviews and acts to improve the effectiveness of the incident management and investigation systems

#### **Comments**

Documents reviewed, plus interviews with staff, confirmed that all staff are encouraged to report any incidents or "near misses" through the incident reporting system. Patients and carers reported that they felt empowered to raise concerns. The Quality Committee provides analysis and feedback to all staff on incident reporting and trends. Trend analysis of incidents drives multiple quality improvement activities and are reflected in the HVPH Risk Register. Information on the outcomes of incident investigations is reviewed at the individual incident and aggregate levels to ensure the system is functioning as intended and to inform improvements where indicated.

#### **ACTION 1.12**

The health service organisation: a. Uses an open disclosure program that is consistent with the Australian Open Disclosure Framework b. Monitors and acts to improve the effectiveness of open disclosure processes

#### **Comments**

Healthscope has established an open disclosure program which is consistent with the Australian Open Disclosure Framework. The HVPH Director of Nursing and General Manager monitors how, why and when open disclosure occurs. Senior managers were able to articulate their role in open disclosure and felt supported in initiating and participating in open disclosure.

| The health service organisation has an organisation-wide complaints management system, and: a. Encourages and supports patients, carers and families, and the workforce to report complaints b. Involves the workforce and consumers in the review of complaints c. Resolves complaints in a timely way d. Provides timely feedback to the governing body, the workforce and consumers on the analysis of complaints and actions taken e. Uses information from the analysis of complaints to inform improvements in safety and quality systems f. Records the risks identified from the analysis of complaints in the risk management system g. Regularly reviews and acts to improve the effectiveness of the complaints management system |                    |
| Comments   |                    |
| Assessors were able to review the organisation's complaints management policy and processes. This demonstrated that an organisation-wide complaints management system is established, which supports patients, carers and the workforce to report complaints. Documentation shows that staff and consumers are appropriately involved in the review of complaints, which are resolved in a timely way. Feedback is provided to the governing body, the workforce and consumers on the analysis of complaints. Action is taken to inform improvements both in response to individual complaints where indicated and based on identified trends which also inform the risk register.   |                    |

## Standard 2 - Partnering with Consumers

Leaders of a health service organisation develop, implement and maintain systems to partner with consumers. These partnerships relate to the planning, design, delivery, measurement and evaluation of care. The workforce uses these systems to partner with consumers.

| ACTION 2.01  |                    |
|--|--------------------|
| Clinicians use the safety and quality systems from the Clinical Governance Standard when: a. Implementing policies and procedures for partnering with consumers b. Managing risks associated with partnering with consumers c. Identifying training requirements for partnering with consumers   |                    |
| Comments   |                    |
| Interviews with staff and patients together with a review of policies and procedures supporting partnering with consumers show that the principles of safety and quality are applied when these documents are developed. Consumers are engaged in policy development, implementation and training. They assist HVPH in identifying risks associated with partnering with consumers and inform risk mitigation. Training is provided to staff at orientation. |                    |

## Standard 3 - Preventing and Controlling Healthcare-Associated Infection

Leaders of a health service organisation describe, implement and monitor systems to prevent, manage or control healthcare-associated infections and antimicrobial resistance, to reduce harm and achieve good health outcomes for patients. The workforce uses these systems.

| ACTION 3.01  |                    |
|--|--------------------|
| The workforce uses the safety and quality systems from the Clinical Governance Standard when: a. Implementing policies and procedures for infection prevention and control b. Identifying and managing risks associated with infections c. Implementing policies and procedures for antimicrobial stewardship d. Identifying and managing antimicrobial stewardship risks  |                    |
| Comments   |                    |
| <p>HVPH has an established Infection Control Program, including antimicrobial stewardship, with all infection control documents aligned with the quality and safety systems. The implementation of these documents (policies and procedures) can be observed across all clinical care areas within HVPH.</p> <p>The HVPH and overarching Healthscope policies and procedures are reflective of current evidence-based practice. They identify and manage risks whilst aligning with the requirements of the 2021 edition of the Preventing and Controlling Infection Standard.</p> <p>The organisation is compliant with Advisory AS20/02.</p> |                    |

## Standard 4 - Medication Safety

Leaders of a health service organisation describe, implement and monitor systems to reduce the occurrence of medication incidents, and improve the safety and quality of medication use. The workforce uses these systems.

| ACTION 4.01   |                    |
|---|--------------------|
| Clinicians use the safety and quality systems from the Clinical Governance Standard when: a. Implementing policies and procedures for medication management b. Managing risks associated with medication management c. Identifying training requirements for medication management  |                    |
| Comments  |                    |
| The governance of medication management is defined by policies and procedures that apply a risk-based approach to effectively minimise incidents and harm. Staff are provided with medication management training that is commensurate with their roles. Medication management is overseen by the HVPH Quality and Pharmacy Committees and reports their quality process and outcome measures through the Healthscope governance structure. |                    |
| Rating  | Applicable HSF IDs |
| Met   | All                |

| ACTION 4.02  |                    |
|--|--------------------|
| The health service organisation applies the quality improvement system from the Clinical Governance Standard when: a. Monitoring the effectiveness and performance of medication management b. Implementing strategies to improve medication management outcomes and associated processes c. Reporting on outcomes for medication management |                    |
| Comments   |                    |
| HVPH monitors the effectiveness of the medication management system through incident reporting and key performance indicators. Reports are provided through the clinical governance structure and strategies are identified to improve performance when issues are identified.   |                    |
| Rating   | Applicable HSF IDs |

## Standard 5 - Comprehensive Care

Leaders of a health service organisation set up and maintain systems and processes to support clinicians to deliver comprehensive care. They also set up and maintain systems to prevent and manage specific risks of harm to patients during the delivery of health care. The workforce uses the systems to deliver comprehensive care and manage risk.

| ACTION 5.01   |                    |
|---|--------------------|
| Clinicians use the safety and quality systems from the Clinical Governance Standard when: a. Implementing policies and procedures for comprehensive care<br>b. Managing risks associated with comprehensive care c. Identifying training requirements to deliver comprehensive care   |                    |
| Comments  |                    |
| The HVPH clinicians are well supported with the systems and processes in place with evidenced based guidelines and industry standards to support the delivery of safe comprehensive care with appropriate safety strategies. This was evidenced through staff and patient interviews and reviews of clinical documentation. |                    |
| Rating  | Applicable HSF IDs |
| Met   | All                |

| ACTION 5.02   |                    |
|---|--------------------|
| The health service organisation applies the quality improvement system from the Clinical Governance Standard when: a. Monitoring the delivery of comprehensive care b. Implementing strategies to improve the outcomes from comprehensive care and associated processes c. Reporting on delivery of comprehensive care  |                    |
| Comments  |                    |
| At HVPH, comprehensive care is defined and monitored with a wide range of quality improvement activities that have been established to improve comprehensive care outcomes such as implementation of a falls working group to address an increase in fall risks. Reporting occurs through the overall committee structure with escalation to the board as required. The organisation uses feedback, data and outcomes together with evidenced based practice to support improvements in care. |                    |

|---|--------------------|
| The health service organisation has processes relevant to the patients using the service and the services provided: a. For integrated and timely screening and assessment b. That identify the risks of harm in the 'Minimising patient harm' criterion   |                    |
| Comments  |                    |
| HVPH screen and assess patients for risks, aimed at minimising preventable harm prior to admission. Clinicians were able to describe the risk assessment process completed at admission and transfer of patients from other facilities. Regular audits are undertaken to support that timely and comprehensive risk screening and patient assessment is completed. The organisation is compliant with the requirements of Advisory AS18/14. |                    |

| ACTION 5.10  |                    |
|--|--------------------|
| Clinicians use relevant screening processes: a. On presentation, during clinical examination and history taking, and when required during care b. To identify cognitive, behavioural, mental and physical conditions, issues, and risks of harm c. To identify social and other circumstances that may compound these risks  |                    |
| Comments   |                    |
| HVPH has strict screening guidelines in place to identify patients at high risk with cognitive, behavioural, mental, and physical conditions, issues, and risks of harm that are not suitable for admission. VMO's have this in place for elective admissions and all transfers are screened by HVPH nursing liaison officer at transferring health facility. A comprehensive assessment is conducted on admission to identify any other circumstances that may affect these risks. The organisation is compliant with the requirements of Advisory AS18/14. |                    |
| Rating   | Applicable HSF IDs |
| Met  | All                |

|--|--------------------|
| Clinicians comprehensively assess the conditions and risks identified through the screening process  |                    |
| Comments   |                    |
| The system and process at HVPH for recognising and capturing cognitive function is provided by the compliance with the admission criteria. Risks are identified using standardised screening tools which identify the level of risk and appropriate actions to mitigate them. High risk patients are largely excluded through compliance with the admission criteria. Continuous monitoring is undertaken by the multidisciplinary teams to ensure compliance with elective and transferring patients. |                    |

|--|--------------------|
| The health service organisation providing services to patients at risk of falls has systems that are consistent with best-practice guidelines for: a. Falls prevention b. Minimising harm from falls c. Post-fall management   |                    |
| Comments   |                    |
| Staff were able to describe the processes and monitoring of risk assessment of falls that were undertaken at HVPH both at admission and continuously with daily updates of the care plans. Falls risks are minimal, as patient selection for surgery is very selective and prevention strategies include asking the patient to bring any aids, they may use to assist them to walk, such as a stick, wheelie walker and in some cases a family member or carer to assist them. However, an increase in falls on the rehabilitation ward was identified. A working party was established involving nursing staff and allied health to identify and implement mitigating strategies to minimise the risks and ensure implementation of post fall management processes. Some of these strategies include identification of high-risk patients with continuously monitoring aides; posters related stop the use of slip resistant socks based on the evidence that it actually increases the risk to high-risk patients; diversional therapies for patients that are at high risk. |                    |

## Standard 6 - Communicating for Safety

Leaders of a health service organisation set up and maintain systems and processes to support effective communication with patients, carers and families; between multidisciplinary teams and clinicians; and across health service organisations. The workforce uses these systems to effectively communicate to ensure safety.

| ACTION 6.01  |                    |
|--|--------------------|
| Clinicians use the safety and quality systems from the Clinical Governance Standard when: a. Implementing policies and procedures to support effective clinical communication b. Managing risks associated with clinical communication c. Identifying training requirements for effective and coordinated clinical communication   |                    |
| Comments   |                    |
| HVPH Policies and procedures are in place to support effective clinical communication including handover. These policies identify risk management strategies and the training requirements / expectation of all staff in support of effective clinical communication. Assessors viewed supporting documentation and witnessed various processes related to clinical communication. |                    |
| Rating   | Applicable HSF IDs |
| Met  | All                |

| ACTION 6.02  |                    |
|--|--------------------|
| The health service organisation applies the quality improvement system from the Clinical Governance Standard when: a. Monitoring the effectiveness of clinical communication and associated processes b. Implementing strategies to improve clinical communication and associated processes c. Reporting on the effectiveness and outcomes of clinical communication processes |                    |
| Comments   |                    |
| Incidents relating to failure in clinical communication are reported through the HVPH incident management system RiskMan and identified in patient feedback. This drives improvements and changes in communication strategies and processes. The effectiveness of clinical communication, including handover is monitored through feedback and audit.                          |                    |
| Rating   | Applicable HSF IDs |
| Met  | All                |

Org Name : Hunter Valley Private Hospital  
Org Code : 120308

| ACTION 6.03  |                    |
|--|--------------------|
| Clinicians use organisational processes from the Partnering with Consumers Standard to effectively communicate with patients, carers and families during high-risk situations to: a. Actively involve patients in their own care b. Meet the patient's information needs c. Share decision-making  |                    |
| Comments   |                    |
| HVPH has a patient centred approach with communication to patients, family and carers about many aspects of their care, including shared decision-making, supporting the delivery of continuous and safe care. Patients are involved in clinical handover, and the assessors witnessed handover supporting this. Patients who were interviewed reported being engaged in their care and that they had information available to them to make informed decisions about their care. |                    |
| Rating   | Applicable HSF IDs |
| Met  | All                |

| ACTION 6.04   |                    |
|---|--------------------|
| The health service organisation has clinical communications processes to support effective communication when: a. Identification and procedure matching should occur b. All or part of a patient's care is transferred within the organisation, between multidisciplinary teams, between clinicians or between organisations; and on discharge c. Critical information about a patient's care, including information on risks, emerges or changes   |                    |
| Comments  |                    |
| HVPH has policies and processes in place to support appropriate identifiers are used, in procedure matching, transfer of care, handover, discharge and where changes in clinical care / patient risk profile are identified. Many communication processes involving structured communication were observed by assessors over the three days – clinical handovers, hospital transfers, Perioperative Surgical safety Checklist (SSC), referrals to other multidisciplinary teams; all of these were documented very well whilst meeting mandatory patient identification processes every time. |                    |
| Rating  | Applicable HSF IDs |
| Met   | All                |

Org Name : Hunter Valley Private Hospital  
Org Code : 120308

| ACTION 6.05   |                    |
|---|--------------------|
| The health service organisation: a. Defines approved identifiers for patients according to best-practice guidelines b. Requires at least three approved identifiers on registration and admission; when care, medication, therapy and other services are provided; and when clinical handover, transfer or discharge documentation is generated |                    |
| Comments  |                    |
| HVPH has policies that define the use of three approved identifiers. Staff interviewed by the assessment team were able to describe how and when these are used. Patients were also able to describe the questions asked to confirm their identity and the assessors witnessed this when observing admission, discharge and handover processes. |                    |
| Rating  | Applicable HSF IDs |
| Met   | All                |

| ACTION 6.06   |                    |
|---|--------------------|
| The health service organisation specifies the: a. Processes to correctly match patients to their care b. Information that should be documented about the process of correctly matching patients to their intended care  |                    |
| Comments  |                    |
| Assessors noted the use of approved patient identifiers. Additionally, processes are in place for Surgical Safety Checklist (SSC) procedural time-out, and this is documented and audited, with compliance at 100%. The Healthscope Perioperative SSC was an excellent improvement initiative between HVPH and another Healthscope facility where a Fire Risk Assessment score has been added to this checklist to ensure the risk associated with fire is highlighted every for time for every patient to ensure optimal safe care in the perioperative setting. |                    |
| Suggestion(s) for Improvement   |                    |
| For preoperative paediatric/ special needs patients consider the use of armbands for both parents/ carers to ensure smooth safe transition if other cares/ family is required to support patient undergoing surgery or procedures.  |                    |
| Rating  | Applicable HSF IDs |
| Met   | All                |

Org Name : Hunter Valley Private Hospital  
Org Code : 120308

| ACTION 6.07  |                    |
|--|--------------------|
| The health service organisation, in collaboration with clinicians, defines the: a. Minimum information content to be communicated at clinical handover, based on best-practice guidelines b. Risks relevant to the service context and the particular needs of patients, carers and families c. Clinicians who are involved in the clinical handover   |                    |
| Comments   |                    |
| Clinical handover documentation contains the required minimum content, relevant risk and needs of the patient, and the clinicians involved in handover. Compliance with these requirements is audited and reported to the HVPH committee structure. Staff could explain their respective roles in clinical handover the processes used to support this including the minimum information communicated at clinical handover. This supported the clinical handovers witnessed by members of the assessment team. |                    |
| Rating   | Applicable HSF IDs |
| Met  | All                |

| ACTION 6.08  |                    |
|--|--------------------|
| Clinicians use structured clinical handover processes that include: a. Preparing and scheduling clinical handover b. Having the relevant information at clinical handover c. Organising relevant clinicians and others to participate in clinical handover d. Being aware of the patient's goals and preferences e. Supporting patients, carers and families to be involved in clinical handover, in accordance with the wishes of the patient f. Ensuring that clinical handover results in the transfer of responsibility and accountability for care  |                    |
| Comments   |                    |
| The assessment team witnessed clinical handover that was structured and effectively engaged with patients, their carers and families in defining goals of care and decision making during the preadmission and discharge processes. The processes in place for clinical handover ensure the relevant clinicians are actively engaged in the process and members of the multidisciplinary team are encouraged to be involved as necessary. Both patients and staff were able to articulate the process of handover and provide confirmation of patients, care and family in decision making. Assessor was given evidence of the Clinical handover audits undertaken regularly and where quality improvement activities have been made undertaken to improve compliance. |                    |
| Rating   | Applicable HSF IDs |
| Met  | All                |

Org Name : Hunter Valley Private Hospital

| ACTION 6.09   |                    |
|---|--------------------|
| Clinicians and multidisciplinary teams use clinical communication processes to effectively communicate critical information, alerts and risks, in a timely way, when they emerge or change to: a. Clinicians who can make decisions about care b. Patients, carers and families, in accordance with the wishes of the patient                   |                    |
| Comments  |                    |
| The HVPH has policies and procedures to guide staff in effective communication and handover of critical information including risks and alerts. Clinical handover involves patients, their carers and families as required. Clinical handover is audited, and incidents / feedback related to communication issues are addressed appropriately. |                    |
| Rating  | Applicable HSF IDs |
| Met   | All                |

| ACTION 6.10   |                    |
|---|--------------------|
| The health service organisation ensures that there are communication processes for patients, carers and families to directly communicate critical information and risks about care to clinicians  |                    |
| Comments  |                    |
| HVPH documentation shows communication processes are in place for patients, carers and families to directly communicate critical information and risks about care. Clinicians and patients / carers interviewed confirmed this and the assessors observed information available to support and facilitate this process. |                    |
| Rating  | Applicable HSF IDs |
| Met   | All                |

Org Name : Hunter Valley Private Hospital  
Org Code : 120308

| ACTION 6.11  |                    |
|--|--------------------|
| The health service organisation has processes to contemporaneously document information in the healthcare record, including: a. Critical information, alerts and risks b. Reassessment processes and outcomes c. Changes to the care plan              |                    |
| Comments   |                    |
| Clinical documentation reviewed by the assessors confirmed compliance with HVPH processes to ensure complete, accurate and up to date information is recorded in the healthcare record and monitored regularly with audits with high compliance rates. |                    |
| Rating   | Applicable HSF IDs |
| Met  | All                |

## Standard 7 - Blood Management

Leaders of a health service organisation describe, implement and monitor systems to ensure the safe, appropriate, efficient and effective care of patients' own blood, as well as other blood and blood products. The workforce uses the blood product safety systems.

| ACTION 7.01  |                    |
|--|--------------------|
| Clinicians use the safety and quality systems from the Clinical Governance Standard when: a. Implementing policies and procedures for blood management<br>b. Managing risks associated with blood management c. Identifying training requirements for blood management |                    |
| Comments   |                    |
| Policies and procedures consistent with the organisation's safety and quality systems are in place for blood management and the management of associated risks. Training is provided to eligible clinical staff with compliance reported at 93%.                       |                    |
| Rating   | Applicable HSF IDs |
| Met  | All                |

| ACTION 7.02  |                    |
|--|--------------------|
| The health service organisation applies the quality improvement system from the Clinical Governance Standard when: a. Monitoring the performance of the blood management system b. Implementing strategies to improve blood management and associated processes c. Reporting on the outcomes of blood management |                    |
| Comments   |                    |
| HVPH monitors the blood management process in terms of blood and blood product utilisation, quality and safety and patient outcomes. Reports are provided to the Quality Committee and clinicians.   |                    |
| Rating   | Applicable HSF IDs |
| Met  | All                |

Org Name : Hunter Valley Private Hospital  
Org Code : 120308

| ACTION 7.03  |                    |
|--|--------------------|
| Clinicians use organisational processes from the Partnering with Consumers Standard when providing safe blood management to: a. Actively involve patients in their own care b. Meet the patient's information needs c. Share decision-making   |                    |
| Comments   |                    |
| HVPH supports the engagement of consumers in care related to blood management including informed decision making. One patient who was receiving the blood product (Privigen) was interviewed and confirmed her engagement in informed consent. |                    |
| Rating   | Applicable HSF IDs |
| Met  | All                |

| ACTION 7.04  |                    |
|--|--------------------|
| Clinicians use the blood and blood products processes to manage the need for, and minimise the inappropriate use of, blood and blood products by: a. Optimising patients' own red cell mass, haemoglobin and iron stores b. Identifying and managing patients with, or at risk of, bleeding c. Determining the clinical need for blood and blood products, and related risks |                    |
| Comments   |                    |
| HVPH processes and policies support the clinically effective and efficient use of blood and blood products. Utilisation is monitored and action has been taken to minimise wastage and the inappropriate use of blood and blood products which is reported through the Quality Committee.  |                    |
| Rating   | Applicable HSF IDs |
| Met  | All                |

| ACTION 7.05   |                    |
|---|--------------------|
| Clinicians document decisions relating to blood management, transfusion history and transfusion details in the healthcare record  |                    |
| Comments  |                    |
| Assessors reviewed a limited number of transfusion records in the clinical records and found evidence to support the effective documentation of decision making and transfusion details. This is supported by regular audit of transfusion records. |                    |
| Rating  | Applicable HSF IDs |

## Standard 8 - Recognising and Responding to Acute Deterioration

Leaders of a health service organisation set up and maintain systems for recognising and responding to acute deterioration. The workforce uses the recognition and response systems.

| ACTION 8.01  |                    |
|--|--------------------|
| Clinicians use the safety and quality systems from the Clinical Governance Standard when: a. Implementing policies and procedures for recognising and responding to acute deterioration b. Managing risks associated with recognising and responding to acute deterioration c. Identifying training requirements for recognising and responding to acute deterioration |                    |
| Comments   |                    |
| The management of recognising and responding to acute deterioration at HVPH is well supported by a range of local and Healthscope policies and procedures. Staff were able to describe their role on such events. Risks and training needs are identified, and training records were made available to members of the assessment team.                                 |                    |
| Rating   | Applicable HSF IDs |
| Met  | All                |

| ACTION 8.02  |                    |
|--|--------------------|
| The health service organisation applies the quality improvement system from the Clinical Governance Standard when: a. Monitoring recognition and response systems b. Implementing strategies to improve recognition and response systems c. Reporting on effectiveness and outcomes of recognition and response systems  |                    |
| Comments   |                    |
| HVPH has processes in place to support and promote early detection and recognition of acute deterioration, and the response to patients whose condition acutely deteriorates. These systems are consistent with the National Consensus Statement: Essential elements for recognising and responding to acute physiological deterioration, the National Consensus Statement: Essential elements for safe and high-quality end-of-life care, the National Consensus Statement: Essential elements for recognising and responding to deterioration in a person's mental state, and the Delirium Clinical Care Standard. |                    |
| Rating   | Applicable HSF IDs |
| Met  | All                |

Org Name : Hunter Valley Private Hospital

| ACTION 8.05   |                    |
|---|--------------------|
| The health service organisation has processes for clinicians to recognise acute deterioration in mental state that require clinicians to: a. Monitor patients at risk of acute deterioration in mental state, including patients at risk of developing delirium b. Include the person's known early warning signs of deterioration in mental state in their individualised monitoring plan c. Assess possible causes of acute deterioration in mental state, including delirium, when changes in behaviour, cognitive function, perception, physical function or emotional state are observed or reported d. Determine the required level of observation e. Document and communicate observed or reported changes in mental state |                    |
| Comments  |                    |
| HVPH has policies and procedures to support staff in identifying acute deterioration in mental state including the risk of delirium. HVPH clinical Pathways documentation reviewed by the assessors also supported that assessment drives the establishment of individualised and appropriate and management plans for patients with acute mental deterioration and / or delirium. Clinical documentation is audited regularly for compliance with documentation of any acute deterioration. Processes are in place to support timely communication between members of the treating team and the patient, carers and family members as detailed in Standard 6.<br>The requirements of Advisory AS 19/01 have been met.            |                    |
| Rating  | Applicable HSF IDs |
| Met   | All                |

| ACTION 8.06  |                    |
|--|--------------------|
| The health service organisation has protocols that specify criteria for escalating care, including: a. Agreed vital sign parameters and other indicators of physiological deterioration b. Agreed indicators of deterioration in mental state c. Agreed parameters and other indicators for calling emergency assistance d. Patient pain or distress that is not able to be managed using available treatment e. Worry or concern in members of the workforce, patients, carers and families about acute deterioration |                    |
| Comments   |                    |
| HVPH staff and patients interviewed were aware of these processes and able to describe them to members of the assessment team, including the process for escalation of care where needed.<br><br>Documentation reviewed identified policies and procedures are in place to support clinical staff in the management and escalation of clinical deterioration. The requirements of Advisory AS 19/01 have been met (8.6 b,c,d,e).   |                    |

| ACTION 8.07  |                    |
|--|--------------------|
| The health service organisation has processes for patients, carers or families to directly escalate care   |                    |
| Comments   |                    |
| At HVPH, the REACH initiative recently involved the consumers to redesign posters for the REACH program to ensure a clear understanding of escalation of care to consumers. Therefore, the REACH processes are in place for patients, carers or families to directly escalate care. Interviews with clinical staff, patients and carers confirmed this and observation of the escalation system used across the organisation further supported this process. |                    |

|--|--------------------|
| The health service organisation provides the workforce with mechanisms to escalate care and call for emergency assistance  |                    |
| Comments   |                    |
| The HVPH policy for escalation of care is clear and provides direction for staff to escalate care and respond to a clinical emergency. Staff were able to describe this process and the assessors were provided with documentation to support the evaluation of these processes. |                    |

|--|--------------------|
| The workforce uses the recognition and response systems to escalate care   |                    |
| Comments   |                    |
| HVPH staff were able to articulate the key communication and systems in place to escalate care consistent with the HVPH policy and procedure that is in place for the safe response to acute deterioration across the facility by the multidisciplinary teams. An example of consistent improvement was the setup of the Code Blue working party to ensure consistent communication and improvements as identified were made. Audit compliance reports provided to the assessment team confirmed the effectiveness of these processes. |                    |

| ACTION 8.10  |                    |
|--|--------------------|
| The health service organisation has processes that support timely response by clinicians with the skills required to manage episodes of acute deterioration  |                    |
| Comments   |                    |
| Education is provided to clinicians to support the timely and effective management of patients who acutely deteriorate. Clinicians are trained and supported to respond appropriately to any signs of deterioration not only with Basic Life Support (BLS) but also Advanced Life Support (ALS) both paediatric and adult in areas that require these specific responses. The ongoing support of ALS training to staff is to be commended. |                    |

| ACTION 8.11   |                    |
|---|--------------------|
| The health service organisation has processes to ensure rapid access at all times to at least one clinician, either on site or in close proximity, who can deliver advanced life support  |                    |
| Comments  |                    |
| HVPH provides access to clinicians with advanced life support skills and competency. Training records were made available to the assessors with 100% of current staff with BLS, 60% of staff with ALS with continuous plan in place with more training for ALS. |                    |

| ACTION 8.12  |                    |
|--|--------------------|
| The health service organisation has processes to ensure rapid referral to mental health services to meet the needs of patients whose mental state has acutely deteriorated   |                    |
| Comments   |                    |
| HVPH has processes in place to ensure timely referral to mental health services if such an event occurred. Admission exclusion criteria preclude patients with diagnosed cognitive impairment, dementia, or mental health risk factors from being accepted for surgery. All HVPH patients complete a preop health assessment tool and have a phone call preop to identify any psychosocial/ delirium concerns which determine if patient is deemed appropriate for admission to HVPH. The requirements of Advisory AS 19/01 have been met. |                    |

| ACTION 8.13  |                    |
|--|--------------------|
| The health service organisation has processes for rapid referral to services that can provide definitive management of acute physical deterioration  |                    |
| Comments   |                    |
| HVPH has processes in place that staff were able to explain for the rapid referral and transfer for acute deteriorating patients including Anaphylaxis and Sepsis pathways of all patients. Staff were able to explain these processes to members of the assessment team with clear escalation pathways for referral of acute physical deteriorating patients. |                    |
