Introduction

The Australian Council on Healthcare Standards

The Australian Council on Healthcare Standards (ACHS) is Australia's leading healthcare assessment and accreditation provider. ACHS is an independent, not-for-profit organisation dedicated to improving quality and inspiring excellence in health care. We accredit organisations according to either government standards, or our own established standards.

ACHS is approved to accredit the following standards

- National Safety and Quality Health Service (NSQHS) Standards including the Multi-Purpose Services Aged Care Module (MPS Module)
- National Safety and Quality Digital Mental Health (NSQDMH) Standards
- National Safety and Quality Primary and Community Healthcare (NSQPCH) Standards
- National Clinical Trials Governance Framework
- Royal Australian College of General Practitioners (RACGP) Standards for general practices (5th edition) and the RACGP Standards for point-of-care testing (5th edition)
- National Standards for Mental Health Services (NSMHS)
- Rainbow Tick Standards
- EQUiP Standards

Currently there are more than 1,600 healthcare organisations, including their associates, that undertake ACHS assessment and quality improvement programs. ACHS are proud to accredit the majority of all public and private hospitals in Australia.

With representation from governments, consumers and peak health bodies from throughout Australia, ACHS works with healthcare professionals, consumers, government and industry stakeholders to implement healthcare accreditation programs.

ACHS offers a variety of services including accreditation, education and training, data and benchmarking and consulting. We take a partnership approach to continuous improvement, tailored to the needs of individual services and health systems, using our expertise in accreditation, standards development and education.

Australian Commission on Safety and Quality in Health Care

The Australian Commission on Safety and Quality in Health Care (Commission) leads and coordinates national improvements in healthcare safety and quality. It works in partnership with patients, carers, clinicians, the Australian, state and territory health systems, the private sector, managers and healthcare organisations to achieve a safe, high-quality and sustainable health system.

Key functions of the Commission include developing national safety and quality standards, developing clinical care standards to improve the implementation of evidence-based health care, coordinating work in specific areas to improve outcomes for patients, and providing information, publications and resources about safety and quality.

The Commission works in four priority areas:

1. Safe delivery of health care
2. Partnering with consumers
3. Partnering with healthcare professionals
4. Quality, value, and outcomes

The Australian Health Service Safety and Quality Accreditation (AHSSQA) Scheme

Under the National Health Reform Act 2011, the Commission is responsible for the formulation of standards relating to health care safety and quality matters. This includes formulating and coordinating the Australian Health Service Safety and Quality Accreditation Scheme (the AHSSQA Scheme), which provides for the national coordination of accreditation processes.

The AHSSQA Scheme sets out the responsibilities of accrediting agencies in relation to implementation of the following safety and quality standards:

- National Safety and Quality Health Service (NSQHS) Standards including the Multi-Purpose Services Aged Care (MPS) Module
- National Safety and Quality Digital Mental Health (NSQDMH) Standards
- National Safety and Quality Primary and Community Healthcare (NSQPCH) Standards, and
- Any other set of standards that may be developed by the Commission from time to time

The National Safety and Quality Health Service (NSQHS) Standards were developed by the Commission in collaboration with the Australian Government, states and territories, the private sector, clinical experts, patients, and carers. The primary aims of the NSQHS Standards are to protect the public from harm and to improve the quality of health service provision. They provide a quality assurance mechanism that tests whether relevant systems are in place to ensure that expected standards of safety and quality are met.

There are eight NSQHS Standards, which cover high-prevalence adverse events, healthcare associated infections, medication safety, comprehensive care, clinical communication, the prevention and management of pressure injuries, the prevention of falls, and responding to clinical deterioration. Importantly, the NSQHS Standards have provided a nationally consistent statement about the standard of care consumers can expect from their health service organisations.

Rating scale definitions

Whenever the NSQHS Standards (2nd ed.) are assessed, actions are to be rated using the rating scale outline below:

Rating	Description
Met	All requirements of an action are fully met.
Met with recommendations	<p>The requirements of an action are largely met across the health service organisation, with the exception of a minor part of the action in a specific service or location in the organisation, where additional implementation is required. If there are no not met actions across the health service organisation, actions rated met with recommendations will be assessed during the next assessment cycle. Met with recommendations may not be awarded at two consecutive assessments where the recommendation is made about the same service or location and the same action. In this case an action should be rated not met.</p> <p>In circumstances where one or more actions are rated not met, the actions rated met with recommendations at initial assessment will be reassessed at the final assessment. If the action is not fully met at the final assessment, it can remain met with recommendations and reassessed during the next assessment cycle. If the organisation is fully compliant with the requirements of the action, the action can be rated as met.</p>

Rating	Description
Not met	Part or all of the requirements of the action have not been met.
Not applicable	The action is not relevant in the service context being assessed. The Commission's advisory relating to not applicable actions for the health sector need to be taken into consideration when awarding a not applicable rating and assessors must confirm the action is not relevant in the service context during the assessment visit.

For further information, see [Fact sheet 4: Rating scale for assessment](#)

Repeat Assessment

If a health service organisation has 16 or more percent of assessed actions **rated not met and /or met with recommendations**, and /or more than 8 actions from the Clinical Governance Standard not met at initial assessment and is subsequently awarded accreditation, the organisation is required to undertake a further assessment within six months of the assessment being finalised. All actions rated not met or met with recommendations from the initial assessment will be reassessed. The aim of the reassessment is to ensure the organisation has fully embedded the necessary improvements in their safety and quality systems to maintain compliance with the NSQHS Standards. This is a one-off assessment with a remediation period of 60 business days. **All actions must be met when the assessment is finalised for the organisation to retain its accreditation.**

For further information, see [Fact Sheet 3: Repeat assessment of health service organisations](#)

Safety and Quality Advice Centre and Resources

The Advice Centre provides support for health service organisations, assessors, and accrediting agencies on NSQHS Standards implementation, the Primary and Community Healthcare Standards, the Digital Mental Health Standards, the National General Practice Accreditation (NGPA) Scheme, the National Pathology Accreditation Scheme, and the National Diagnostic Imaging Accreditation Scheme.

Org Name : Newcastle Private Hospital
Org Code : 120643

Authority to act as an Accrediting Agency

I, Dr Karen Luxford, CEO of the Australian Council on Healthcare Standards (ACHS) declare that ACHS has the approval from the Australian Commission on Safety and Quality in Health Care to conduct assessment to the *NS2.1 Short Notice Final Assessment*. This approval is current until 31st December, 2024.

Under this authority, ACHS is authorised to assess health service organisations against the Australian Health Service Safety and Quality Accreditation Scheme.

Conflicts of Interest

I, Dr Karen Luxford, declare that ACHS has complied with Australian Commission on Safety and Quality in Health Care policy on minimising and managing conflicts of interest.

No conflicts of interest were evident as part of this assessment and no Consultants or third parties participated in this assessment.

Org Name : Newcastle Private Hospital
Org Code : 120643

Assessment Team

Assessor Role	Name	Declaration of independence from health service organisation signed
Lead Assessor	Stuart MacKinnon	Yes

Assessment Determination

ACHS has reviewed and verified the assessment report for Newcastle Private Hospital. The accreditation decision was made on 21/08/2024 and Newcastle Private Hospital was notified on 21/08/2024.

Org Name : Newcastle Private Hospital
Org Code : 120643

Executive Summary

On 07/08/2024, Newcastle Private Hospital underwent an NS2.1 Short Notice Final Assessment. Below is a summary of the Health Service Facilities (HSFs) that were reviewed as part of this assessment:

Health Service Facility Name	HSF Identifier	Delivery Type
Newcastle Private Hospital	101000	Desktop

Summary of Recommendations Subject to the Final Assessment

Facilities(HSF IDs)	Initial Assessment MWR	Initial Assessment NM
Newcastle Private Hospital-101000	8.01	

The final assessment was conducted for Newcastle Private Hospital on 07/08/2024. The following report outlines the assessment team's findings.

Org Name : Newcastle Private Hospital
Org Code : 120643

General Discussion

Newcastle Private Hospital completed a Final Assessment to the National Safety and Quality Health Service Standards on the 7 August 2024, undertaken by desktop/virtual assessment. This Assessment considered one previous Met with Recommendation for Action 8.01, relating to Maternity staff mandatory training.

This recommendation has been met with needed training now at high rates of completion and a sustainable program evident. Staff are seen to be well engaged in training requirements.

Org Name : Newcastle Private Hospital
Org Code : 120643

Assessor Findings at Final Assessment

Below is a summary of the findings of the assessment team:

ACTION	
8.01	Clinicians use the safety and quality systems from the Clinical Governance Standard when: a. Implementing policies and procedures for recognising and responding to acute deterioration b. Managing risks associated with recognising and responding to acute deterioration c. Identifying training requirements for recognising and responding to acute deterioration
Initial Assessment Comments	Initial Assessment Recommendation(s) / Risk Rating & Comment
Assessors noted poor rates of compliance with several of the mandatory training requirements for midwives. Whilst some progress has occurred, this has been slow. This was particularly evident in CTG training. Data provided to assessors showed Antenatal CTG training at 47%, Intrapartum CTG at 77%, Pre-eclampsia training was 50%, and cord presentations 55%. There is a risk that midwives who have not completed pertinent training may not be sufficiently skilled to recognise and / or respond to obstetric emergencies at times of clinical deterioration.	Rating: Met with Recommendation Applicable: All Recommendation: The organisation needs to demonstrate midwives' compliance with the Healthscope mandatory training matrix associated with maternity care, to ensure that they have completed relevant training modules so that they are skilled and competent to recognise and respond to obstetric emergencies and escalate care as required. Risk Rating: High
Final Assessment Comments	
Newcastle Private Hospital has implemented and evaluated actions to close off this recommendation. Staff data has been cleansed, to ensure current staffing data is applied correctly and staff have been well engaged to ensure training completion. Training completion data for modules at the time of assessment ranges from 89% to 100%. Processes are in place to maintain needed training.	
Final Assessment Rating	Applicable
Met	All

Org Name : Newcastle Private Hospital
Org Code : 120643

Summary of Accreditation Status

A summary of the Accreditation awarded is outlined in the below table:

Health Service Facility Name	HSF Identifier	Accreditation Status
Newcastle Private Hospital	101000	3 years Accreditation
